

Fall 2017
Tuesday Seminar Series

4:00-5:30pm

Biology/Physics Building 130

Please join us for refreshments in the BPB Lobby at 3:45.

September

19th Dr. Tim Miyashiro, Pennsylvania State University (Host: Dr. Graf)
"Niche-Specific Adaptation of Bacterial Symbionts within a Host."

26th Dr. Daniel DiMaio, Yale University (Host: Dr. Teschke)
"Building proteins with minimal chemical complexity."

October

3rd Dr. Robert Brucker, Harvard University (Host: Dr. Hird)

10th Dr. Shirin Bahmanyar, Yale University (Host: Dr. Mellone)

17th Dr. Lucia Carbone, Oregon Health & Science University (Host: Dr. R. O'Neill)
"LAVA flow and genomic earthquakes: the gibbon has it all!"

24th Dr. Stacey Gilk, Indiana University (Host: Dr. Heaslip)

31st Dr. Janna Nawroth, Emulate Inc., (Host: Dr. Nyholm)
"When 9+2 equals flow (or not): Diverse roles of motile cilia in health and disease."

November

7th Dr. Vaughn Cooper, University of Pittsburgh (Host: Dr. Graf)
"Why mutation rates vary among species and within genomes."

14th Dr. Iain Cheeseman, Whitehead Institute (Host: Dr. Mellone)
"Generating a Dynamic Kinetochore-Microtubule Interface."

28th Dr. Karen Maxwell, University of Toronto (Host: Dr. Teschke)

December

5th Dr. Christopher Lennon, SUNY, Albany (Host: Dr. Papke)
