

## **MCB 5893: Special Topics in Cellular and Molecular Biology**

This course is associated with the weekly MCB seminar series. Students are required to attend the Tuesday seminars each week and submit oral or written questions to the speakers (typically outstanding researchers in the field of molecular and cell biology from institutions across the country). In addition, several of the seminars will be followed by an hour-long meeting with the speaker. Students enrolled in the course are required to participate in these meetings, which are an opportunity to discuss research (or other related topics) with a prominent researcher in the field.

1.00 - 2.00 credits | May be repeated for a total of 2 credits.

**Prerequisites:** None.

**Grading Basis:** Satisfactory/Unsatisfactory

Selected topics in cellular and molecular biology presented by invited speakers.
