

GRAD 5910

RESPONSIBLE CONDUCT OF RESEARCH

Spring 2019

Coordinator & Instructor : Dave Daggett, PhD

E-mail: david.daggett@uconn.edu

You may set up a time to meet with me or communicate by email. When communicating by e-mail please include "GRAD 5910" in the subject line to help distinguish your message from other mail. I will try to answer e-mails within 24hrs.

Course Description

This course will give an introduction to the core issues underlying the Responsible Conduct of Research (RCR). This course will have out of class and in-class components. Over the course of the semester, students will independently complete the CITI Online RCR course. In addition, there will be supplemental assignments in preparation for in-class discussions, and in some weeks we may have outside speakers addressing specific RCR topics. The Final Assignment will be a Case Study that you will explore and present as small groups, reflecting your critical engagement of the course material.

Link to CITI online RCR course. Choose Log In from my Institution, University of Connecticut Storrs and Reginal Campuses. You should be able to use your NetID info. Sign up for the "Biomedical Responsible Conduct of Research" Course.

<https://www.citiprogram.org/index.cfm?pageID=14>

Additional Supplementary Materials will be provided via our **HuskyCT site – check it out!**

Class time and place

Thursdays 2:00PM–4:00PM, Engineering II Rm 323

Assignments

Completed written assignments should be sent as a Word.docx; david.daggett@uconn.edu **Please include your name and which Assignment it is, in the document.**

Assignments will not be individually graded. They are meant to prepare for in class discussions and outside speaker topics, and to provide a chance for you to demonstrate that you are engaging the material with sufficient thought and reflection (see Grade section below).

Case Study Final

The last scheduled class (TBA) is for our Case Study Final Presentations. Toward the end of the course, you will be assigned small groups and given a Case Study Topic. You will then have at least a week as a group to get together and discuss the situation, and come up with an analysis based on what you have learned and explored during the course. On the final day, each group will present the Case and Analysis to the rest of the class.

Grade: S/U; based on attendance, completion of assignments, participation and demonstration of a critical engagement with the course materials.
