

Fall 2018 Tuesday Seminar Series 4:00-4:50pm Biology/Physics Building 130

Please join us for refreshments in the BPB Lobby at 3:45.

September

- 18th Carole Dabney-Smith, Miami University (Host: Dr. Alder)
"Assembling the chloroplast Twin Arginine Transport (cpTAT) pathway"
- 25th Ming Xu, UConn Health Center (Host: Dr. Campellone)
"Targeting cellular senescence to alleviate age-related tissue dysfunction"

October

- 2nd Kevin Kohl, University of Pittsburgh (Host: Dr. Hird)
"Who's in charge here?: Microbial contributions to animal physiology, ecology, and evolution"
- 9th Laura Williams, Providence College (Host: Dr. Broderick)
"What makes a good killer?: Investigating interactions between predatory bacteria and prey"
- 16th Juliana Cortines, Federal University of Rio de Janeiro (Host: Dr. Teschke)
"Spotting the giants"
- 23rd Khairallah Symposium: Raja Jothi, National Institute of Environmental Health Sciences (Host: Dr. Campellone)
"Uncovering Unknown Unknowns of Gene Regulation"
- 30th Paul Jardine, University of Minnesota (Host: Dr. Teschke)
"Using bacteriophages as a model for macromolecular assembly and force generation of biological motors"

November

- 6th Lillian Fritz-Laylin, University of Massachusetts (Host: Dr. Campellone)
"Our evolving view of cell motility"
- 13th Kathryn Kauffman, Massachusetts Institute of Technology (Host: Dr. Papke)
"Resolving the structure of virus-host interactions in the ocean"

December

- 4th Blaire Steven, University of Connecticut (Host: Dr. Klassen)
"Biological Soil Crusts as a Model for Soil Carbon Cycling"
