

### Fall 2018 Tuesday Seminar Series 4:00-4:50pm Biology/Physics Building 130

Please join us for refreshments in the BPB Lobby at 3:45.

---

#### September

- 18<sup>th</sup> Carole Dabney-Smith, Miami University (Host: Dr. Alder)  
"Assembling the chloroplast Twin Arginine Transport (cpTAT) pathway"
- 25<sup>th</sup> Ming Xu, UConn Health Center (Host: Dr. Campellone)  
"Targeting cellular senescence to alleviate age-related tissue dysfunction"

#### October

- 2<sup>nd</sup> Kevin Kohl, University of Pittsburgh (Host: Dr. Hird)  
"Who's in charge here?: Microbial contributions to animal physiology, ecology, and evolution"
- 9<sup>th</sup> Laura Williams, Providence College (Host: Dr. Broderick)  
"What makes a good killer?: Investigating interactions between predatory bacteria and prey"
- 16<sup>th</sup> Juliana Cortines, Federal University of Rio de Janeiro (Host: Dr. Teschke)  
"Spotting the giants"
- 23<sup>rd</sup> Khairallah Symposium: Raja Jothi, National Institute of Environmental Health Sciences (Host: Dr. Campellone)  
"Uncovering Unknown Unknowns of Gene Regulation"
- 30<sup>th</sup> Paul Jardine, University of Minnesota (Host: Dr. Teschke)  
"Using bacteriophages as a model for macromolecular assembly and force generation of biological motors"

#### November

- 6<sup>th</sup> Lillian Fritz-Laylin, University of Massachusetts (Host: Dr. Campellone)  
"Our evolving view of cell motility"
- 13<sup>th</sup> Kathryn Kauffman, Massachusetts Institute of Technology (Host: Dr. Papke)  
"Resolving the structure of virus-host interactions in the ocean"
