Molecular and Cell Biology Seminar Series

Dr. Kevin Kohl
Assistant Professor
Department of Biological Sciences
University of Pittsburgh

“Who’s in charge here?: Microbial contributions to animal physiology, ecology, and evolution”

Research in the Kohl lab investigates interactions between animal physiology and gut microbial communities. The lab utilizes comparative, experimental, and computational approaches to investigate microbe-dependent physiological functions at various levels of biological organization and in diverse animal systems.

Date: Tuesday, October 2, 2018
Time: 4:00 PM
Place: BPB 130
Hosted by: Sarah Hird

If you require an accommodation to participate in this event, please contact the Department of MCB at mcboffice@uconn.edu and 860-486-4329 at least 5 days in advance of the event.
